

Advanced Materials for Challenging Environments Knowledge Network (AMCEKN)

Advanced materials underpin much of today's technical innovation and this new knowledge network, sponsored by SEEDA, seeks to support this innovation by bringing South East businesses and the UK knowledge base together, to exploit research opportunities, catalyse collaboration and bring more innovation to market in the field of 'advanced materials for challenging environments'.

The Network was launched on the 19th July 2010 with an event focusing on surface engineering, coatings and treatments, attracting over 80 delegates. Further events are planned for the coming months.

Become part of this network now by registering free at www.amcekn.co.uk

Benefits of Membership

Registering for the Network has the benefits of;

- **Early email notification of forthcoming events**
- **Priority for event booking**
- **Access to material related news**
- **Access to presentations from past events**
- **Developing your company network and access to Primes**
- **Free to present your company details in the AMCE KN Directory**
- **Facilitation and support with partnership formation, access to the knowledge base, funding opportunities and support to bid preparation**

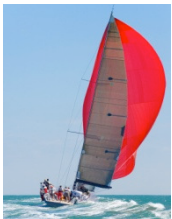

Collaboration

AMCEKN works in close collaboration with other SEEDA Knowledge Networks, the Innovation & Growth teams and has close links with the National KTN network.

Market Sector Focus

The AMCEKN will focus on those market sectors of key importance to the South East economy.

- **Aerospace**
- **Marine**
- **Healthcare**
- **Built Environment**
- **Space**
- **'Low Carbon' Industries'**
